SKILLS

 Adaptability

My adaptability and receptiveness to diverse perspectives make me a valuable asset in any collaborative environment.

 Attention to detail

Fundamental grasp of the issue, adeptly processing and thoroughly analyzing the details.

 Version Control

Experience with version control systems like Git for collaborative development and tracking changes to code repositories.

MOTIVATION

From a young age, I was always curious about how computers work, which eventually led me to dive into coding and web development. I recently completed the 6-month [Alpha JS Track program](#), where I built up my skills from scratch and got hands-on with JavaScript and web app development.

Currently seeking new opportunities as a Frontend Developer, where I can leverage my expertise in creating engaging, user-friendly web interfaces. With a strong foundation in HTML, CSS, JavaScript, and modern frameworks like React, I am eager to contribute to innovative projects and collaborate with dynamic teams to build exceptional digital experiences.

When I'm not working, you'll usually find me playing video games, hanging out with friends, or working out.

SKILLS

Teamwork

Proficiency in effective communication, collaboration with diverse perspectives, and constructive contribution to collective objectives enabling successful team dynamics.
